RESTRICTION ON DISCLOSURE AND USE OF DATA (FAR 52.215-1(e))

This proposal includes data that shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed — in whole or in part — for any purpose other than to evaluate this proposal. If, however, a contract is awarded to this offeror as a result of — or in connection with — the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the resulting contract. This restriction does not limit the Government's right to use information contained in this data if it is obtainable from another source without restriction. The data subject to this restriction are contained in all pages of this volume.

1. Maintenance Record Digitization and Data Extraction

Corvane will capture maintenance records with template-based optical character recognition. Our template library covers DA Form 2404 inspection worksheets.

DA Form 5988-E printouts and DA Form 2408 logbooks will be transcribed by hand by Corvane data entry staff at our Huntsville processing center, with a target turnaround of three business days.

2. GCSS-Army Integration and Readiness Reporting

Extracted records are delivered to GCSS-Army in a nightly batch file transfer. Readiness reports reflect the previous day's records.

Corvane will provide weekly summary reports of open faults by installation.

3. Cybersecurity and Risk Management Framework Compliance

Corvane will host the solution in a DoD Impact Level 5 environment and support the Government through the Risk Management Framework assessment, targeting an Authority to Operate within nine months of award. Corvane meets DFARS 252.204-7012.
