# CivicWorks Technologies Corp

Proposal in response to Solicitation FA8771-27-R-0012 — Enterprise IT Modernization Services

Department of the Air Force

**Volume I — Technical**

## 1. Cloud Migration Methodology

CivicWorks will rehost each application to the Air Force cloud environment using a lift-and-shift approach that preserves the current architecture and minimizes change to the application teams.

Our engineers manually rebuild each server in the target environment, copy application data during a scheduled maintenance window, and validate with the application owner before decommissioning the source.

CivicWorks expects to complete migrations at a pace of six to eight applications per month.

## 2. Cybersecurity and Continuous ATO

CivicWorks will maintain each application's existing security controls in the new environment and support continuous monitoring through quarterly vulnerability scans reported to the information system security manager.

## 3. Legacy Application Rationalization

CivicWorks will migrate all 140 applications as currently configured so the Government can make rationalization decisions after the migration is complete.
