Harborview Student Systems Inc

Proposal in response to RFP WUSD-RFP-27-014 — Student Information System

Willowmere Unified School District

Section 1 — Functional and Technical Response

1. State Reporting, Enrollment and Attendance

Harborview's state reporting is Ed-Fi certified and exchanges enrollment, attendance, discipline, course and staff data with the State's Ed-Fi ODS/API nightly. Automated validation checks every record against the state's business rules before submission, so errors are corrected at the school before a deadline rather than after. At our reference districts every state submission over the last three years was accepted on first filing.

Attendance is taken by period or by day from the teacher's class list on any device. Unexcused absences trigger parent notifications within 15 minutes, and chronic absence dashboards flag students who have missed 10 percent or more of enrolled days.

2. Scheduling, Gradebook and Special Education

The master scheduler builds secondary schedules from course requests, balances sections and resolves conflicts automatically, and counselors can run what-if scenarios before publishing. The gradebook supports standards-based and traditional grading and posts report cards and transcripts directly from teacher grades.

Special education, IEP and Section 504 management are built into the core product, not a separate add-on. Case managers draft IEPs, schedule meetings, track service minutes and progress monitoring, and produce state special education child count reports from the same student record.

3. Parent and Student Portal, Security and Privacy

Families use a single portal and mobile app, available in 14 languages, to view grades, attendance, schedules and fees and to complete annual registration online. Students see assignments and grades with the same sign-in, and the District's SSO/SAML identity provider is supported for staff and students.

Student data is encrypted in transit and at rest, access is role-based down to the field level, and every change to a student record is logged. Harborview complies with FERPA and COPPA and will sign the District's student data privacy agreement without exceptions.
