RESTRICTION ON DISCLOSURE AND USE OF DATA (FAR 52.215-1(e))

This proposal includes data that shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed — in whole or in part — for any purpose other than to evaluate this proposal. If, however, a contract is awarded to this offeror as a result of — or in connection with — the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the resulting contract. This restriction does not limit the Government's right to use information contained in this data if it is obtainable from another source without restriction. The data subject to this restriction are contained in all pages of this volume.

1. Intelligent Document Intake and Classification

Brightwater's machine learning classifier identifies the document type and extracts key fields from scanned and digital submissions.

On an industry benchmark of commercial insurance claim documents, the classifier achieved 89 percent accuracy. Brightwater will tune the model on VA documents during the first six months of performance.

2. Claims Routing and Workload Management

Brightwater routes each claim using skills-based assignment: claims are matched to processors by contention type, complexity and certification. The router rebalances the work queues every 15 minutes based on each station's backlog.

Supervisors can override an assignment, and every override is logged for quality review.

3. Accessibility and Section 508 Conformance

Section 508 conformance will be addressed during user acceptance testing before each major release.
