RESTRICTION ON DISCLOSURE AND USE OF DATA (FAR 52.215-1(e))

This proposal includes data that shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed — in whole or in part — for any purpose other than to evaluate this proposal. If, however, a contract is awarded to this offeror as a result of — or in connection with — the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the resulting contract. This restriction does not limit the Government's right to use information contained in this data if it is obtainable from another source without restriction. The data subject to this restriction are contained in all pages of this volume.

1. Intelligent Document Intake and Classification

Orinoco will capture incoming claim evidence with template-based optical character recognition. Our template library covers 12 of the 43 claim form types VA receives, including VA Form 21-526EZ.

Documents that do not match a template are indexed by hand by Orinoco data entry staff at our Richmond processing center, with a target turnaround of two business days.

2. Claims Routing and Workload Management

Claims are routed with static rules that map each claim type to a regional office. VA staff can request rule changes through a monthly change board.

Orinoco will provide weekly workload reports by regional office.

3. Accessibility and Section 508 Conformance

Orinoco commits to WCAG 2.1 Level AA conformance. Automated accessibility scans run against each release candidate, and findings are fixed before production deployment.
