Point of contact: Marcus Lindqvist, Chief Executive Officer

October 30, 2026 · Valid for 120 days from the proposal due date

RESTRICTION ON DISCLOSURE AND USE OF DATA (FAR 52.215-1(e))

This proposal includes data that shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed — in whole or in part — for any purpose other than to evaluate this proposal. If, however, a contract is awarded to this offeror as a result of — or in connection with — the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the resulting contract. This restriction does not limit the Government's right to use information contained in this data if it is obtainable from another source without restriction. The data subject to this restriction are contained in all pages of this volume.

1. Predictive Maintenance Analytics

Ironwood will build failure-prediction models from GCSS-Army maintenance records using commercial machine learning services, retrained each quarter.

2. Data Integration with GCSS-Army

A standard data model maps GCSS-Army and legacy STAMIS feeds into a single logistics view, refreshed every four hours.

The platform runs in the Army cloud environment and assumes continuous network access for every unit that uses it.

3. Cybersecurity and RMF

Ironwood will complete the RMF package within the first 120 days and maintain continuous monitoring through quarterly assessments.
