October 30, 2026 · Valid for 180 days from the proposal due date

CONFIDENTIAL AND PROPRIETARY INFORMATION

Pages of this proposal marked "Confidential" contain trade secrets and proprietary information that the proposer asks the District to withhold from public disclosure under the state public records law. The proposer understands that the proposal becomes a public record once the District's award is final, except for the pages so marked, and that the District may disclose any part of this proposal not so marked.

1. Course Delivery and Assessment

Teachers build courses from units, lessons and assignments, share them across a grade level or department, and publish to multiple sections at once. Students see a single to-do list across classes, and families receive a weekly summary of upcoming and missing work.

The assessment engine supports standards-aligned item banks, rubrics, auto-graded quizzes and teacher-scored work, and passes final grades back to the District SIS gradebook automatically.

2. Accessibility and Mobile Access

Quillmark provides an independently audited WCAG 2.1 AA conformance report (VPAT) for the student and teacher experience, with no open Level A or AA issues. Screen readers, keyboard-only navigation, captioning and text-to-speech work throughout, including in quizzes and discussions.

The offline mobile app lets students download coursework at school, complete it at home without internet, and submit work automatically when the device reconnects, which supports students without reliable home broadband.

3. Interoperability and Rostering

Quillmark is LTI 1.3 certified, so the District's existing digital curriculum tools launch inside courses with single sign-on and grade return. Classes, enrollments and teachers are rostered automatically from the SIS through OneRoster 1.2 every night, and staff and students sign in through the District's SSO/SAML provider.

Quillmark complies with FERPA and COPPA and will sign the District's student data privacy agreement.
