CONFIDENTIAL AND PROPRIETARY INFORMATION

Pages of this proposal marked "Confidential" contain trade secrets and proprietary information that the proposer asks the District to withhold from public disclosure under the state public records law. The proposer understands that the proposal becomes a public record once the District's award is final, except for the pages so marked, and that the District may disclose any part of this proposal not so marked.

1. Course Delivery and Assessment

Instructors build courses from modules and pages and publish them to sections. Tallpine's assessment engine supports large question banks, randomized test forms, timed exams and originality checking on written submissions.

2. Accessibility and Mobile Access

Tallpine provides a WCAG 2.1 AA conformance report for its web interface. A mobile app is available for viewing course content and grades.

3. Interoperability and Rostering

Tallpine supports LTI 1.3 tool launches and SSO/SAML sign-in. Tallpine does not support OneRoster; classes and enrollments are loaded by manual CSV upload, which District staff would prepare from the SIS and upload whenever schedules change.
