COPPERLINE TRANSIT SOFTWARE INC

1180 Foundry Wharf Way, Suite 300, Portland, OR 97209

State vendor ID CT7L4R9W2KXM

SECTION 1 — FUNCTIONAL AND TECHNICAL RESPONSE

PROPOSAL

Submitted in response to RFP No. WUSD-RFP-27-021

Student Transportation Routing and Fleet Management

Submitted to

Willowmere Unified School District
Purchasing Department
410 Orchard Avenue, Willowmere, OR 97000
Attn: Dana Whitfield, Procurement Officer

Submitted by

Copperline Transit Software Inc
1180 Foundry Wharf Way, Suite 300, Portland, OR 97209
Point of contact: Marguerite Ellison-Park, Chief Executive Officer

October 30, 2026 · Valid for 180 days from the proposal due date

CONFIDENTIAL AND PROPRIETARY INFORMATION

Pages of this proposal marked "Confidential" contain trade secrets and proprietary information that the proposer asks the District to withhold from public disclosure under the state public records law. The proposer understands that the proposal becomes a public record once the District's award is final, except for the pages so marked, and that the District may disclose any part of this proposal not so marked.

1. Route Planning and Optimization

Copperline's routing engine builds and optimizes every District route from student addresses, bell times, stop safety rules and bus capacity. Dynamic routing re-optimizes only the affected routes when a student enrolls, moves or changes schools, and the routing coordinator approves each change before it is published to drivers and families. At our reference districts, a summer route rebuild that took six weeks by hand now takes four days, and total route miles fell 11 percent in the first year.

Special education transportation is planned in the same engine with a dedicated IDEA route planner, not a spreadsheet. Each student's IEP transportation requirements — door-to-door pickup, wheelchair lift, car seat or safety vest, a required bus aide, maximum ride time and approved alternate addresses — are imported from the District's special education records and enforced as hard constraints, so the optimizer will never assign a student who uses a wheelchair to a bus without a lift, or a student who requires an aide to a route without one.

Case managers see each student's assigned route, pickup time and ride time, and the planner produces the special education transportation reports the District needs for IEP meetings and state reporting.

2. Real-Time GPS Fleet Tracking and RFID Student Ridership

Each of the District's 88 buses receives a Copperline vehicle gateway with GPS, cellular connectivity, a driver tablet and an RFID card reader at the door. Bus locations update every 10 seconds on the dispatcher map, and dispatch is alerted automatically when a bus runs more than five minutes late, leaves its route or stops longer than expected.

Students tap a District-issued RFID card when boarding and exiting. Every scan is recorded with the time, stop and GPS location, so dispatch and school staff can confirm within seconds whether a student boarded, got off at the right stop or is still on board. The driver tablet sounds an alert if a student scans onto the wrong bus or exits at a stop other than their assigned one, and a post-trip child check must be completed before the route can be closed.

3. Parent and Student App, Notifications and Privacy

Copperline's parent and student app is built and operated by Copperline, not licensed from a third party. It shows the live location of the student's bus, sends a stop arrival alert when the bus is a family-chosen number of minutes from the stop, and sends alerts for delays, substitute buses and the student's RFID boarding and exiting scans. The app and all notifications are available in 9 languages — English, Spanish, Russian, Ukrainian, Vietnamese, Chinese, Arabic, Somali and Marshallese — and families without smartphones can receive the same alerts by text message or voice call.

Copperline complies with FERPA and COPPA. Student data is encrypted in transit and at rest, hosted in U.S. data centers and never sold or used for advertising, and the app collects no information from children under 13 beyond what the District authorizes. Copperline will sign the District's student data privacy agreement without exceptions, staff sign in through the District's SSO/SAML identity provider, and parent and staff screens conform to WCAG 2.1 AA.
