SYNTHETIC DEMO RFP — NOT AN ACTUAL DISTRICT PROCUREMENT

SECTION 6 — EVALUATION CRITERIA AND SCORING

RFP No. WUSD-RFP-27-021 · Student Transportation Routing and Fleet Management · Willowmere Unified School District

6.1 EVALUATION PROCESS

Proposals are first reviewed by the Procurement Officer for responsiveness (every required section and form, within its page limit) and responsibility (an active state vendor registration and no listing on the state debarment list). Responsive proposals are released to an evaluation committee whose members score each proposal independently, then meet to agree a consensus score for each criterion. The District may invite the highest-scoring proposers to oral presentations and request a best and final offer.

6.2 EVALUATION CRITERIA AND POINTS

Proposals will be scored out of 100 points on the following criteria:

Criterion	Maximum points	Evaluated from
Routing, Tracking and Parent Communication	40	Section 1 — Functional and Technical Response
Implementation, Training and Support	15	Section 2 — Implementation and Support
Experience and References	15	Section 3 — Experience and References
Cost	30	Section 4 — Cost Proposal
Total	**100**	

Proposals are scored out of 100 points: Routing, Tracking and Parent Communication 40, Implementation, Training and Support 15, Experience and References 15, and Cost 30. Cost points are awarded by formula: the lowest total five-year cost receives 30 points and each other proposal receives (lowest cost ÷ its cost) × 30.

6.3 CRITERION 1 — ROUTING, TRACKING AND PARENT COMMUNICATION (40 POINTS)

The District will evaluate how well the proposed system plans and optimizes general education and special education routes, including the door-to-door, wheelchair lift, bus aide and ride time requirements of students whose IEPs require transportation under IDEA; how often it reports each bus's real-time GPS location and whether it records student boarding and exiting by RFID card; and how its parent and student app delivers stop arrival notifications in families' home languages while protecting student data under FERPA and COPPA.

The committee will consider the following, which are of equal importance:

(a) Route planning and optimization, including special education and IDEA transportation

(b) Real-time GPS fleet tracking and RFID student ridership

(c) Parent and student app, stop arrival notifications and FERPA/COPPA privacy

This criterion will be scored from Section 1 — Functional and Technical Response using the scoring guide in Section 6.7.

6.4 CRITERION 2 — IMPLEMENTATION, TRAINING AND SUPPORT (15 POINTS)

The District will evaluate the realism of the implementation schedule and its timing relative to the first day of school, the plan for converting the District's current routes, stops and student assignments and integrating with the District SIS through OneRoster or a nightly file, the training approach for dispatchers, drivers, bus aides and families, and the proposed support hours, response times and uptime commitment.

SYNTHETIC DEMO RFP — NOT AN ACTUAL DISTRICT PROCUREMENT

The committee will consider the following, which are of equal importance:

(a) Implementation schedule and route conversion

(b) Training for dispatchers, drivers and families

(c) Support, service levels and uptime

This criterion will be scored from Section 2 — Implementation and Support using the scoring guide in Section 6.7.

6.5 CRITERION 3 — EXPERIENCE AND REFERENCES (15 POINTS)

The District will evaluate the proposer's experience implementing student transportation routing and fleet tracking systems in K-12 districts of similar size and complexity within the last five years, based on the references provided and the ratings those districts give.

The committee will consider the following, which are of equal importance:

(a) Recency

(b) Relevance to K-12 districts of similar size

(c) Reference ratings

This criterion will be scored from Section 3 — Experience and References using the scoring guide in Section 6.7.

6.6 CRITERION 4 — COST (30 POINTS)

The District will award cost points by formula on the total five-year cost, which is the sum of all four price items. The lowest total five-year cost receives 30 points and each other proposal receives (lowest cost ÷ its cost) × 30. The District will also review individual price items for balance against its cost estimate.

Cost points are awarded by formula and are not scored by the committee: the proposal with the lowest total five-year cost receives all 30 points, and each other proposal receives (lowest total cost ÷ its total cost) × 30. For example, if the lowest total cost is $1,400,000, a proposal at $1,600,000 receives 26.25 points.

6.7 SCORING GUIDE

Each committee member scores each criterion on the following guide. The score earns the stated share of the criterion's maximum points (for example, Good on a 40-point criterion earns 32 points).

Score	Share of points	Description
Excellent	100%	Fully meets and in places exceeds every requirement of the criterion, with clear, specific and well-supported detail. No weaknesses of consequence.
Good	80%	Meets every requirement of the criterion with sound detail. Any weaknesses are minor and easily corrected.
Satisfactory	60%	Meets the basic requirements of the criterion, but with gaps in detail or weaknesses that add some risk.
Poor	40%	Does not meet one or more requirements of the criterion, or is vague enough that the committee cannot judge how they will be met.
Unacceptable	0%	Fails to address the criterion, or contains a deficiency that makes that part of the proposal unworkable.

6.8 BASIS OF AWARD, NOTICE OF INTENT AND PROTEST

The District will award to the responsive and responsible proposer whose proposal is most advantageous to the District, determined by the highest total score out of 100 points. Award is subject to approval by the Willowmere Unified School District Board of Education.

The Award Authority signs the recommendation of award for the Board. After Board approval the Purchasing Department issues a Notice of Intent to Award to every proposer. A proposer may protest in writing within five business days of the notice; the contract is executed after the protest period closes.

SECTION 5 — EXCERPT: PROPOSAL FORMAT AND PAGE LIMITS

Proposals shall be organized in the following sections. Pages beyond a stated limit will not be scored.

Section	Page limit
Transmittal Letter and Required Forms	No page limit
Section 1 — Functional and Technical Response	Not to exceed 30 pages
Section 2 — Implementation and Support	Not to exceed 15 pages
Section 3 — Experience and References	Not to exceed 8 pages
Section 4 — Cost Proposal	No page limit
