CONFIDENTIAL AND PROPRIETARY INFORMATION

Pages of this proposal marked "Confidential" contain trade secrets and proprietary information that the proposer asks the District to withhold from public disclosure under the state public records law. The proposer understands that the proposal becomes a public record once the District's award is final, except for the pages so marked, and that the District may disclose any part of this proposal not so marked.

1. Route Planning and Optimization

Fairhaven's routing workstation optimizes general education routes from student addresses, bell times and bus capacity, and lets the routing coordinator compare alternative route sets side by side by total miles, average ride time and number of buses before publishing. The dispatch console handles daily changes — substitute drivers, bus swaps, field trips and road closures — and pushes turn-by-turn directions to driver tablets.

Special education routes are built in the same workstation. Planners record each student's IEP transportation needs, including door-to-door pickup, wheelchair lift and aide requirements, as student attributes, and the optimizer flags any assignment that conflicts with them for the planner to resolve.

2. Real-Time GPS Fleet Tracking and RFID Student Ridership

Fairhaven installs a GPS unit on each bus that reports the bus location every 60 seconds to the dispatch console and the parent app. Dispatch receives late-bus and off-route alerts.

An RFID card reader on each bus records student boarding and exiting, and scan history is available to dispatch and school offices by student, bus and date.

3. Parent and Student App, Notifications and Privacy

Families use the Fairhaven parent app to see their bus on a map and receive stop arrival alerts in English and Spanish. The app is a white-label product licensed from a third-party mobile app provider and branded for the District.

The app is operated by the third-party provider under its own privacy policy and terms of use, which parents accept when they create an account. Fairhaven complies with FERPA and will sign the District's student data privacy agreement for the data Fairhaven holds; the app provider is not a party to that agreement, and its handling of information from children under 13 is governed by its own policy. Staff sign in through the District's SSO/SAML identity provider.
